

Dear readers,

The tension used by the author throughout this book is 16 sts and 25 rows = 10cm/4in square in stocking stitch worked with UK 10 (3.25mm) needles. We'd like to point out, however, that the author has a unique way of working on very small needles that produces a relatively loose finish, and you may find this difficult to achieve on the needles she suggests.

We therefore strongly recommend that you test the tension of each pattern before beginning, and if necessary adjust the needle size to suit the yarn used. For guidance, if using Jiffy Lion Brand yarn, we recommend you use UK 7 (4.5mm) needles to achieve the correct tension. Another suitable alternative to Jiffy Lion Brand is Rowan Cocoon yarn; if using this yarn we suggest using UK 6 (5mm) needles. Please see page 119 for more information on tension.

Apologies for any inconvenience caused, and happy knitting!
