

6 Apply the thinner side of the magnetic clasp to the centre of the lining, 4cm (1½in) up from the bottom edge (see applying magnetic clasps on page 13). **The second half of the magnetic clasp is fitted to the front bag panel, centrally, 7.5cm (3in) from the bottom.**

7 Pin one half of the flap pocket fabric to the centre of the right side of the outer fabric, with the bottom edges meeting. Draw a box, 4cm (1½in) down from the top and centrally, measuring 23 x 1cm (9 x ½in). Draw a line along the middle of the box and form a 'Y' shape at each end.

8 Sew around the outside of the rectangle. With a small pair of scissors, cut along the central line and into the 'Y' corners, being very careful not to cut through the stitches!

9 'Post' the lining through the hole and press.

10 Take the 25.5cm (10in) zip and tack/baste behind the hole. Sewing the open ends of the zip together first by hand helps. From the right side, sew around the zip. Remove the tacking/basting stitches.
