- This guide is inspirational as well as instructional.

## Description

Immerse yourself in the ancient craft of working with fresh, green wood.

Expert authors Sjors van der Meer and Job Suijker introduce you to the traditional skills of green woodworking. Learn about the qualities of wood; how to cut and shape it; how to craft your own tools such as a shaving horse, wooden club, chopping block and saw horse, and then how to use them to make spoons, spatulas, stools and chairs. As well as teaching you new skills, this inspiring book will show you how working in natural surroundings, with natural materials, can create an overwhelming sense of well-being and enhance your awareness of the environment.

## About the Author

Sjors van der Meer developed his passion for woodworking when he was a student at a furniture making company. He learned all about joinery and became an amateur cabinetmaker. Though this gave him a lot of joy, he fell in love with wood and trees when he discovered the craft of green woodworking; his love for nature and craft came together in this way. The simple hand tools, the raw materials and the often-ancient techniques were a revelation. He decided to make a living out of the craft. Ever since, he has spent a lot of time in nature, working on green wood furniture and spoon carving. Since 2011 he has run green woodworking workshops with his friend and co-author Job Suijker.

Job Suijker studied at the Technical University of Delft and worked for 20 years as an environmental advisor. In his late twenties he developed a passion for nature, especially for trees and forests, with a special fascination for the ancient trees (yew tree) of Great Britain. He fell in love with green woodworking while chopping firewood for his wood stove. After having been to the west coast of Ireland for a sabbatical, a self-educating period started; he saw a chance for a green woodworking revival.
