# Templates

All templates are actual size and do not require scaling

Trace this basic design layout at full size and take photocopies of the design areas so that you can create templates. Be flexible in your approach, and adapt my design to make it your own. I have labelled this image to indicate which techniques have been used; follow the order of work given to complete the project. Change up the colours, fabrics and techniques to suit your own taste, and don't forget that if you don't want to make your own cord from scratch, you can easily purchase it ready-made.

Covered with golden silk (see step 13)

Couched edging (see step 18)

Velvet applied with freezer paper (see step 10)

Closed fly stitch detail (see step 18)

Three layers of felt (see steps 2 and 7)

Long and short stitch edging (see step 15)

Carpet felt layer (see step 4)

Couched cord edging (see step 17)

Felt layer (see step 6)

Covered with golden silk (see step 12)

Organza applied with iron–on adhesive (see steps 8–9)

Felt layer (see step 3)

Covered with golden silk (see step 11)

Couched edging (see step 16)

Satin stitch edging (see step 14)
