A decorative border at the top of the page featuring a repeating pattern of pink hearts of various sizes.

In this chapter you will find the templates for 48 beautiful and unique papercutting projects. Every template is numbered, so you can easily find the right template for the project you are working on. There are also “variation” templates for many of the projects, and some bonus templates that aren’t linked to one specific project but are there for you to experiment with your newfound papercutting skills.

A dotted line is marked down the inside edge of each page to show you where you could cut if you want to use the templates straight out of the book. Use a metal safeguard ruler, self-healing cutting mat, and craft knife to do this. Many of the pages have more than one template, so you might want to use a pair of scissors to cut out the individual templates as you need them, rather than removing the whole page.

If you don’t want to cut up the book then you don’t have to! You can scan the QR code on page 144 to access all of the templates on your computer, and then print them onto regular printer paper as many times as you like to use again and again. You can also trace or photocopy the templates so you can resize or modify them. Or use one of the methods on page 16 to transfer the template straight onto your chosen papercutting paper—so you won’t need to attach a template at all.

Get cutting and have fun!
